Re: AI Marketing Operations Manager

Dear Hiring Team,

The part of this role I'd start on first is generative engine optimization. I built a 9-dimension framework for how AI search and LLMs read a business (entity clarity, topical coverage, internal linking, schema, information gain, and AI visibility), and I've published 10 articles on it, including why ChatGPT won't recommend a business and how Google AI Overviews choose sources. Building that into a website rebuild from the start is exactly where it pays off most.

The rest of the stack is work I already do by hand. I build lead scoring, lifecycle stages, and nurture automation in HubSpot and GoHighLevel. I set up SPF, DKIM, DMARC, and warm-up for outbound myself and keep deliverability above 99%, with hands-on time in Salesloft, Apollo, and HeyReach. I deploy tracking through custom Google Tag Manager triggers and variables, work in HTML and CSS, and call the OpenAI and Claude APIs inside production workflows. At Level Agency I ran account-based LinkedIn campaigns on accounts spending \$20K+ a month.

I'd welcome a conversation at 303-726-5037 or jrotnbrg@gmail.com.

Best,

Joshua Rotenberg
