SUMMARY

Customer-facing technical seller and solution builder with 15+ years in SaaS. I lead discovery with executives, translate business goals into solution designs and implementation plans, and build working integrations myself: webhooks, APIs, batch data imports, and custom JavaScript and Python code steps in Zapier, Make, and n8n, plus AI agent workflows in production. At Accelo, I scoped CRM and professional-services automation implementations for agencies and firms, ranking top three on a team of 8 to 15, and handed sequenced implementation plans to delivery teams.
