SUMMARY

Implementation lead who configures business software for contractors and gets them running on it. At Solenzo I build CRM and automation systems for electrical, plumbing, and HVAC businesses: custom workflows and templates, data imports, integrations, and hands-on training for owners and staff. Before that, 15+ years of SaaS implementation: up to ~25 concurrent onboardings and 25+ launches per month at 110% of implementation targets at Wix, partner onboarding with ~94% retention at Birdeye, and sequenced implementation plans for a CRM/PSA platform at Accelo. I use AI on real work every day, from LLM API calls in production workflows to rubric-graded output.
