SUMMARY

Marketing operations and growth practitioner with 15+ years across MarTech, SaaS, and agency environments, and 5+ years decomposing real business processes into documented, multi-step workflows. My daily work is exactly this scope of work: designing authentic marketing and operational workflows, executing them across Slack, Google Workspace, Notion, and CRM platforms, and documenting every action, decision point, and deliverable clearly enough for someone who wasn't there to reproduce it. I also translate non-technical stakeholder intent into precise prompts and agent instructions for LLM systems, and build the evaluation loops that flag ambiguous or unrealistic cases before they ship.

PROFESSIONAL EXPERIENCE

Founder & Strategic / Marketing Operations Lead | Solenzo LLC

Feb 2024 – Present

Arvada, CO (Remote)

- Break down manual, multi-step marketing workflows into explicit step-by-step sequences and agent architectures — capturing each action, decision point, and expected outcome so the process can be executed consistently by someone who did not design it.
- Architected and deployed a complete GoHighLevel marketing-automation system — 20+ documented workflows spanning lead capture, tagging and routing, qualification, appointment booking with confirmations and reminders, no-show recovery, post-sale onboarding, long-term nurture and reactivation, and automated review generation.
- Translate non-technical stakeholders' generalized ideas and feedback into precise, structured AI prompts and agent instructions — acting as the bridge between loosely-formed business intent and reliable LLM output.
- Design self-improving loops and evaluation frameworks that monitor agent outputs, surface ambiguous or failing cases, and drive iteration cycles against real-world quality standards.
- Run client engagements across Slack, Google Workspace, Notion, HubSpot, and GoHighLevel — referencing threads, shared docs, and CRM records within a single workflow and maintaining organized records of interactions, timelines, and deliverables.
- Write thought leadership, newsletters, and educational guides on systems architecture, CRM optimization, and operational growth — translating complex technical process into clear, structured documentation for non-technical B2B audiences.
- Built a segmented outreach engine including an automated prospect audit workflow that enrolled 180+ contacts, scoring each business's digital footprint to trigger personalized, logic-driven follow-up.
