321 The Agency

Re: GoHighLevel CRM Specialist

Dear Hiring Team,

GoHighLevel is the platform I build in every day. Through my consulting practice, Solenzo, I design and run client environments end to end: discovery, custom fields and pipelines, workflows, booking, email and SMS, and the training that gets a team to actually use it. My main build is a 20+ workflow system covering lead capture and routing, qualification, calendar booking with reminders, no-show recovery, onboarding, reactivation, and automated review requests.

The parts of this role I'd step into fastest are integrations and data. I connect GoHighLevel to outside systems through webhooks, REST APIs, Zapier, Make, and n8n, set up the credentials, and debug the failures myself. I set up email deliverability on my own and keep it above 99%, and I validate every import before anything runs on it. I've also worked hands-on in Salesforce and HubSpot across agency and SaaS roles, so moving data and standards between platforms is familiar ground.

I like the agency side of this work: different clients, different processes, one consistent standard for how the system gets built and documented. I'd welcome a conversation at 303-726-5037 or jrotnbrg@gmail.com.

Best,

Joshua Rotenberg
