SUMMARY

SaaS delivery and implementation lead with 15+ years translating business needs into technical requirements, sequencing the work, and getting it delivered across teams. I built sequenced implementation plans at Accelo, led a team of 20 (later 8) delivering 25+ launches a month at Wix, and today build production integrations and automation myself, so I can talk tradeoffs with engineers and explain them to leadership in plain language. Experienced in Agile/Scrum, Jira, SQL, and Power BI; Denver-based.
