Re: Marketing Automation / Email Specialist, HubSpot

Dear Hiring Team,

The part of marketing I enjoy most is the build: taking a brief and turning it into a segmented, automated program that runs cleanly and gets measurably better every month. That's the role you describe, and it's the work I do every day.

At Solenzo I architect CRM and automation systems in HubSpot and GoHighLevel, from segmentation, lifecycle stages, and data-hygiene rules to the workflows themselves. I've built and deployed 20+ automated email and SMS workflows covering capture, qualification, nurture, reactivation, and review generation, plus a scoring workflow that rated 180+ businesses and triggered personalized outreach from the score. I build the landing pages and forms, write the copy, work in HTML/CSS, and test and report on what's working. Before that I produced email sequences and reported results to clients at Level Agency, and ran accounts in HubSpot at Fetch & Funnel. I also know Salesforce from Birdeye and Wix, which helps when marketing automation has to hand clean data to sales. I don't hold a HubSpot certification yet, and I'd be glad to complete Email Marketing and Marketing Automation early on.

I'd welcome a conversation about the programs you're building. I'm available at 303-726-5037 or jrotnbrg@gmail.com.

Sincerely,

Joshua Rotenberg
