SUMMARY

Operator who fixes processes by going to the source: running the workflow, reading the data, and building the system that makes the fix stick. 15+ years across SaaS operations, onboarding, and sales, including two years leading a team of 20 (later 8) at Wix and co-founding an operations-heavy business from scratch. Today I design and deploy automation and AI agent workflows in production, write SQL for BigQuery and Power BI, and script custom code steps in Python and JavaScript. Remote since 2020.
