SUMMARY

Implementation manager who stays hands-on with the technical work instead of routing it to Engineering. Gathers requirements, configures workflows, builds and troubleshoots REST API integrations (JSON payloads, webhooks, error handling), runs data imports and cleanups with validation (including a 1,400+ contact CRM), and writes SQL and Python or JavaScript when a configuration needs it. Managed about 25 concurrent onboardings at peak at Wix while launching 25+ clients a month at 110% of implementation targets, and sold and scoped Accelo's professional-services automation platform (time tracking, utilization, project budgets) to services firms.
