## SUMMARY

---

Agentic operator and automation specialist building autonomous, AI-driven workflows that execute real work. I break manual business processes into agent architectures, translate loosely-formed stakeholder intent into precise prompts and agent logic, and build the evaluation loops that keep outputs reliable. Fifteen-plus years in business and marketing operations underneath it, so the automation is grounded in how work actually gets done, and documented clearly enough for other people to adopt.

## PROFESSIONAL EXPERIENCE

---

### Founder & AI / Automation Systems Lead | Solenzo LLC

Feb 2024 – Present

Arvada, CO (Remote)

- Architect and deploy autonomous, AI-driven workflows that integrate agents with CRMs, CMS platforms, documents, and messaging tools to automate lead enrichment, outreach, research, and booking.
- Break manual business processes into agent architectures with custom logic, scoring a business's digital footprint and generating hyper-personalized outputs.
- Translate non-technical stakeholders' generalized ideas into precise, structured AI prompts and agent instructions, acting as the bridge between business intent and reliable LLM output.
- Design self-improving loops and evaluation frameworks that monitor agent outputs and continuously optimize accuracy and conversion.
- Built and documented 20+ end-to-end automation workflows and an audit/outreach agent that enrolled 180+ contacts, writing best practices clear enough for others to replicate.
- Analyze operations and information flows across clients, synthesizing findings into actionable recommendations for technical and non-technical audiences.
- Conduct research using AI tools, synthesize findings, and present clear, actionable insights to stakeholders.

### Channel Partnerships & Customer Onboarding | Birdeye

Feb 2023 – Apr 2024

Remote

- Developed automated communication and product-training workflows that reduced manual effort and onboarding friction.
- Collaborated with Product and Engineering to capture structured, high-priority feedback that informed the roadmap, an early version of the agent-feedback loops this role runs on.
- Analyzed utilization and performance data to identify inefficiencies and recommend automated interventions.
- Documented product-training sequences and best practices for scalable, repeatable adoption.

### Account Executive / Client Strategist | Level Agency

Sep 2024 – Feb 2025

Remote

- Built performance reporting frameworks and translated complex data into clear, actionable recommendations for stakeholders.
- Coordinated execution across technical and non-technical teams to connect tools and deliver end-to-end campaigns.
- Documented reporting processes and workflows so they could be handed off and repeated.

### Account Executive / Sales Operations | Fetch & Funnel

Sep 2022 – Feb 2023

Remote

- Built and refined internal processes and automations that improved reporting accuracy and reduced handoff errors.
- Analyzed performance data and synthesized results into optimization recommendations.

### Account Manager & Onboarding Team Lead | Wix.com

Aug 2020 – Aug 2022

Remote

- Designed and documented repeatable onboarding and delivery processes for a team and a high-value portfolio.

- Identified manual bottlenecks and built streamlined workflows that accelerated time-to-value across diverse verticals.
- Trained new hires and produced documentation that made onboarding processes replicable across the team.

#### **Account Executive | Accelo**

Apr 2018 – Jul 2020

Denver, CO

- Scoped and implemented CRM and workflow-automation software, guiding clients through process design, API integrations, and tool orchestration.
- Advised operations and professional-services teams on connecting data sources and systems for end-to-end efficiency.
- Troubleshoot workflow and integration issues, resolving technical challenges before escalation.

#### **Co-Owner / Operations Lead | Standing Akimbo**

Jun 2010 – Sep 2012

Denver, CO

- Built operational infrastructure, intake processes, and reporting systems from scratch, analyzing workflows to design efficient, documented processes.
- Created vendor, supplier, and customer-management systems in a highly regulated environment requiring accuracy and repeatability.
