SUMMARY

Operator who builds and evaluates AI-driven support and workflow systems for a living. At Solenzo, reviews AI agent output against rubric-based grading criteria, designs self-improving evaluation loops, and expands automation coverage across the full customer lifecycle, the same core loop this kind of role is built around. Owns escalations and high-stakes account issues end to end, and brings a founder's comfort with ambiguity, shifting priorities, and building the playbook instead of waiting for one.
