SUMMARY

Implementation and customer onboarding specialist with 15+ years in B2B SaaS, MarTech, and agency environments. Post-sale delivery is the through-line: ~94% retention across a 15–20 partner portfolio at Birdeye, team lead for onboarding and launch operations at Wix, and concurrent end-to-end implementations today through Solenzo. I run kickoff, configuration, contact imports and data hygiene, training, and adoption, and I use ChatGPT and Claude daily for project planning, customer communications, and process optimization.

PROFESSIONAL EXPERIENCE

Founder & Strategic / Marketing Operations Lead | Solenzo LLC

Feb 2024 – Present

Arvada, CO (Remote)

- Lead end-to-end onboarding and implementation for new technology stacks — running discovery, translating business requirements into technical configurations, and delivering hands-on training for firm owners and their teams.
- Manage concurrent implementation projects for a portfolio of service-based businesses, maintaining project plans, timelines, and deliverables in Notion and CRM records so milestones and responsibilities stay clear across stakeholders.
- Architect and configure CRM systems in GoHighLevel and HubSpot — contact imports, segmentation, lifecycle stages, lead routing, and strict data-hygiene protocols that ensure accuracy and completeness through migration.
- Built and deployed a complete workflow-automation system of 20+ workflows spanning lead capture, qualification, appointment booking with confirmations and reminders, no-show recovery, post-sale onboarding nurture, and long-term reactivation.
- Use AI daily as an implementation multiplier — translating non-technical stakeholders' loosely formed ideas into precise prompts and agent instructions, and automating project planning, customer communications, and process optimization.
- Deliver regular performance reporting and strategic recommendations to owners and executives, flagging adoption gaps early and recommending interventions before they become delays.
