SUMMARY

Agentic operator and marketing systems architect who builds and owns production AI agents and automations that execute full-funnel marketing — without engineering support. 15+ years across MarTech, SaaS, and agency environments, including 5+ years hands-on building CRM and marketing-automation infrastructure. I wire LLM workflows into the marketing stack, absorb messy stakeholder requirements and turn them into clean, scoped builds, and treat every system like a product: monitoring, iteration loops, and evaluation frameworks included.

PROFESSIONAL EXPERIENCE

Founder & Strategic / Marketing Operations Lead | Solenzo LLC

Feb 2024 – Present

Arvada, CO (Remote)

- Architect and deploy autonomous, AI-driven marketing systems for B2B service businesses — automating lead enrichment, scoring, outreach, and appointment booking as production systems that run 24/7 without engineering support.
- Break down high-volume manual marketing workflows into agent architectures with custom logic — including an automated audit workflow that enrolled 180+ contacts, scoring each business's digital footprint to generate hyper-personalized outreach.
- Design self-improving loops and evaluation frameworks to monitor agent outputs, catch failures, and continuously optimize conversion — treating internal tooling like a product with fallback logic and iteration cycles.
- Translate non-technical stakeholders' generalized ideas and feedback into precise, structured AI prompts and agent instructions — the bridge between messy business intent and reliable LLM output.
- Rebuilt clients' marketing operations infrastructure end-to-end: 20+ deployed workflows spanning lead capture and routing, qualification and scoring, lifecycle management, nurture, reactivation, and review generation.
- Wire automation and enrichment tooling into client CRMs (HubSpot, GoHighLevel) and CMS platforms so the right data reaches the right system at the right time, with strict data-hygiene protocols.
