SUMMARY

Customer success and onboarding leader who builds the AI and automation behind a scaled success model, not just uses it. At Solenzo, I design, tune, and run AI agents and 20+ production workflows that score customer signals, trigger outreach, recover no-shows, and reactivate accounts, with rubric-based evaluation and human review on the output. Before that, I onboarded 25+ SMB customers a month at Wix while leading a team of 20 (later 8), and retained all but one of 15-20 channel partners at Birdeye. I know what to automate and what needs a person.
