SUMMARY

GTM systems builder who designs outbound as an automated engine, not a headcount plan. Built a segmented cold-outreach system with an automated audit workflow that scores a prospect's digital footprint and triggers personalized messaging, and wires it into the CRM end to end. Writes Python and JavaScript in automation code steps, builds AI agents where off-the-shelf tools stop, and brings 15+ years of B2B sales (BDR through top-three AE) to judge whether outreach actually sounds right.
