## SUMMARY

Marketing operations builder with 15+ years across e-commerce, SaaS, and agency roles, specializing in the systems behind the content: taxonomy, naming and tagging standards, and workflows that let teams find the right approved thing without asking. Built e-commerce storefronts for established retail brands at Wix, defined the CRM field standards for onboarding workflows while leading a 20-person team, and runs technical SEO (site crawls, schema, on-page fixes inside client CMS platforms) at Solenzo. Connects systems with Zapier, Make, and n8n to cut manual downloading, renaming, and re-uploading. Has worked in shared file and asset libraries (Dropbox, Google Drive) in every role, and trains non-technical users until the system sticks. Denver metro based, ready for hybrid in Broomfield.
