SUMMARY

Implementation specialist with 15+ years in B2B SaaS, running concurrent implementations of configurable platforms from scoping through configuration, integration, training, and go-live. At Accelo I scoped and sequenced implementations of a CRM, project, and billing platform for professional-services firms, advising executives on how to run their operations through it. At Wix I launched 25+ clients a month with ~25 in flight at once, at 110% of implementation targets, and led teams of up to 30. Builds and debugs integrations hands-on (REST APIs, webhooks, JSON), coaches customers through process change, and turns recurring issues into repeatable process.
