SUMMARY

Customer success professional and hands-on automation builder. I build production workflows in n8n, Make, and Zapier for clients today, configuring webhooks, REST API calls, LLM API steps, and JavaScript/Python code nodes, and debugging integrations myself. Before Solenzo I spent 15+ years in B2B SaaS post-sale roles: at Birdeye I used utilization signals to flag at-risk partners early and retained all but one of 15-20 (~94%); at Wix I carried up to ~25 concurrent accounts and launched 25+ per month at 110% of implementation targets; at Accelo I guided onboarding, workflow design, and API integrations with C-suite stakeholders.
