SUMMARY

Client-facing implementation lead with 15+ years in MarTech, SaaS, and agency roles, grounded in marketing and media data. Connects and validates marketing data hands-on: GA4 and Google Tag Manager implementations, SQL against BigQuery and GA4 exports, Power BI data models, and API integrations with Python and JavaScript code steps in Zapier, Make, and n8n. Reconciles ad-platform reporting (Google Ads, Meta, LinkedIn) against CRM and conversion data to find where the numbers break. Ran 25+ onboardings a month at Wix at 110% of implementation targets and scoped CRM implementations at Accelo, explaining to clients what the system actually needs from their data and why. Uses agentic AI daily to automate repeatable steps.

PROFESSIONAL EXPERIENCE

Founder & Strategic / Marketing Operations Lead | Solenzo LLC

Arvada, CO (Remote)

- Own client onboardings end to end, from discovery and requirements through source connections, configuration, QA, and go-live, running several concurrent engagements.
- Implement GA4 and Google Tag Manager tracking on every client site, then validate conversion data against CRM records and ad-platform reporting before anything is reported out.
- Write SQL against BigQuery and GA4 exports and build Power BI data models to reconcile campaign, funnel, and pipeline data and isolate the root cause of variances.
- Build API integrations in Zapier, Make, and n8n with custom Python and JavaScript code steps to map, transform, and move data between CRMs, ad platforms, and reporting tools.
- Define field-level structure, lifecycle stages, and data-hygiene rules in GoHighLevel and HubSpot, translating inconsistent client naming into consistent, rules-driven mappings.
- Turn repeated work into reusable templates, workflows, and rubric-based QA checks, applying agentic AI to automate manual, error-prone steps.
