SUMMARY

Go-to-market and marketing strategist with 15+ years in B2B SaaS, MarTech, and agency environments, working between market strategy and the hands-on build. I write the positioning, produce the campaign assets, equip the sales team, and read the performance data myself. At Wix I drove a brand-new vertical from proof of concept to a profitable business line and built the sales training behind it. At Solenzo I define messaging frameworks for service-business clients and translate complex technical and data systems into narratives non-technical buyers understand and act on.

PROFESSIONAL EXPERIENCE

- Translate complex technical systems, automation logic, and performance data into clear narratives and structured recommendations that non-technical business owners act on.
- Develop and execute full-lifecycle customer strategies spanning demand generation, sales CRM architecture, and customer success, aligning marketing programs to revenue objectives directly with owners and sales teams.

- Write and publish thought leadership content, newsletters, and educational guides on systems architecture, CRM optimization, and operational growth for B2B audiences.
- Conduct competitor research, keyword gap analyses, and technical audits to identify positioning opportunities and market gaps, then implement the resulting changes directly.
- Draft the direct-response copy, outreach sequences, and landing pages myself, then track acquisition and retention in GA4 and CRM analytics and use the data to keep iterating.
- Report performance on a regular cadence with actionable insights and strategic recommendations backed by tracking across sales enablement, marketing, and operations.
