SUMMARY

Growth operator who designs the journey from first touch to value realized, then measures where users drop and fixes it. Built Solenzo's product-led acquisition loop from zero: a free audit as the activation moment, automated scoring, segmented follow-up, and conversion to paid. Owned onboarding and launch for 25+ SaaS customers a month at Wix while leading a team of 20, and designed partner onboarding at Birdeye that retained ~94% of the book. Prototypes flows directly in HTML/CSS and with AI coding tools, including Claude Code, and treats funnel data and A/B test results as design inputs, not after-the-fact validation.

PROFESSIONAL EXPERIENCE

Founder & Strategic / Marketing Operations Lead | Solenzo LLC

Feb 2024 - Present

Arvada, CO (Remote)

- Designed and shipped a product-led acquisition loop from zero: a free digital-footprint audit as the first-value moment, automated scoring, and follow-up segmented by what each audit found. 180+ businesses enrolled and 2 converted to paid.
- Architected 20+ lifecycle workflows mapping the full journey, from capture and qualification through booking, no-show recovery, onboarding nurture, reactivation, and review asks, each stage instrumented so drop-off is visible.
- Prototype landing pages and flows directly in HTML/CSS and with AI coding tools (Claude Code, Zapier/Make/n8n code steps in Python and JavaScript), using working code as the fastest way to test an idea.
- Diagnosed on-site conversion friction as the real bottleneck on a client's Google Ads funnel after cutting low-quality leads, tracing the problem past acquisition into the page experience.
- A/B test email subject lines and content, and report funnel progression, conversion, and drop-off in GA4 and CRM dashboards to decide what changes next.
- Design agent logic and rubric-based evaluation loops for AI-generated output, balancing automation speed against output quality and user trust.
