SUMMARY

Client success specialist who owns a client's problem until they say it's fixed. Retained all but one of 15-20 reseller partners at Birdeye, onboarded 25+ clients a month at Wix, and trains less technical users until they're confident on their own. Technically hands-on: works in HTML, CSS, and JSON, traces integration errors, and configures and evaluates AI-generated responses against written standards, the same work as tuning an AI support agent. Came to SaaS after 15+ years in restaurant kitchens, where taking care of people is the whole job.
